

## Applied Bioelectricity

Filesize: 8.4 MB

### **Reviews**

*A must buy book if you need to adding benefit. It is really simplified but shocks in the 50 percent of the pdf. I found out this pdf from my i and dad recommended this publication to learn.*

Condition: New. Publisher/Verlag: Springer, Berlin | From Electrical Stimulation to Electropathology | Electric currents and electromagnetic fields have been applied to biological systems, particularly humans, with both therapeutic and pathological results. This text discusses biological responses to electric currents and electromagnetic fields, including medical applications and shock hazards. It covers fundamental physical and engineering principles of responses to short-term electrical exposure and emphasises human reactions, although animal responses are considered as well, and the treatment covers reactions from the just-detectable to the clearly detrimental. An important new chapter discusses standards for human exposure to electromagnetic fields and electric current and demonstrates how these standards have been developed using the principles treated in earlier chapters. | 1 Introduction.- 1.1 General Perspective.- 1.2 Electrical Exposure.- Electrical Fatalities.- Typical Electrical Exposures.- 1.3 Scales of Short-Term Reactions to Contact Current.- Sensory Reactions.- Muscle Reactions.- Cardiac Reactions.- Thermal Reactions.- Electroporation.- 1.4 Reactions to Electric and Magnetic Field Stimulation.- 1.5 Variables Affecting Thresholds.- 2 Impedance and Current Distribution.- 2.1 Dielectric Properties of Biological Materials.- Conductivity and Permittivity.- Cellular Membranes.- Skin Depth.- 2.2 Skin Impedance.- Detailed Structure of Skin.- Equivalent Circuit Models.- Area Proportionality of Skin Admittance.- Skin Capacitance.- Time-Variant and Nonlinear Aspects of Skin Impedance.- 2.3 Total Body Impedance: Low-Frequency and DC.- Distribution of Current and Impedance Within the Body.- Current Through the Heart.- Applicability of Measurements on Corpses.- Statistical Distribution of Impedance.- 2.4 Impedance at Higher Frequencies.- 2.5 Impedance Through Foot Contact.- 2.6 High-Voltage and Transient Properties.- Spark and Contact Components.- Plateau Voltage.- Spark Discharges and Corneal Degradation.- Discharge Impedance.- Variation with Stimulus Location.- Polarity Effects.- Stimulus Time Constants.- Minimum Impedance with Spark Discharge.- Internal Body Impedance.- 2.7 Impedance of Domestic Animals.- 3 Electrical Principles of Nerve and Muscle Function.- 3.1 Introduction.- 3.2 Cellular Membranes.- The Nernst Equation.- 3.3 The Excitable Nerve Membrane.- The Hodgkin-Huxley...
