RareBooksClub. Paperback. Book Condition: New. Paperback. 28 pages. OCLC Number: 52262903

Excerpt: . . . describes patients with similar therapy, nursing, and special care needs and has a corresponding payment rate. The RUG classification system is hierarchical. The first distinction made is whether the patient has received (or is expected to receive) at least 45 minutes a week of therapy (see fig. 1). For these rehabilitation patients, further divisions - into ultra high, very high, high, medium, and low therapy categories - are made based on the total minutes and type of physical, occupational, and speech therapy provided over 7 days. Each of these categories is defined by a range of therapy minutes and the type of therapy provided. For example, patients in the very high category receive between 500 and 719 minutes of therapy over 7 days. Each category is further subdivided into RUGs, based on a patients dependency in performing ADLs, such as eating, transferring from a bed to a chair, or using the toilet. There are 14 rehabilitation RUGs, which account for three-fourths of Medicare-covered stays. Page 5 GAO-02-841 SNF Responses to Payment System This item ships from multiple locations.
