Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The Space Vector Pulse Width Modulation technique generally we have algorithms based on the angle information. This requires more computational efforts. In this book focused on the simplified algorithm for the SVPWM Techniques without considering angle information. This contains four types of switching sequences, over these we can which one gives better performance. The comparison of the sequences defined based on the type samples (odd and even samples) per sector. The odd number of samples will gives better performance. | Format: Paperback | Language/Sprache: english | 99 gr | 220x150x3 mm | 60 pp.
